Skills: C++| Python | HTML | CSS | Javascript | Node.js| React.js | Bootstrap | MongoDB | DBMS | DSA
Developer Tools: Git | Github | VS Code | Jupyter Notebook | Excel
Soft-Skills: Teamwork|communication|Problem-solving|Adaptable

Projects

Code Reviewer
- GitHub [Repo] Live:[Visit]
- MERN-based web app that uses Google's Gemini model to provide instant AI feedback on user-written code—highlighting errors, offering suggestions, and improving code quality.

WasteNot
- GitHub [Repo] Live:[Visit]
- Smart food expiry tracker built with MERN stack; notifies users before food spoils, reducing waste. Utilized MongoDB Atlas for persistence and Groq AI for intelligent suggestions.

PassOP
- GitHub [Repo] Live:[Visit]
- Secure password manager with CRUD operations, built using React. Features responsive UI, state management, and client-side validation to enhance usability and data protection.

Achievements

HackHazards (2025)

Participated in HackHazards, one of the largest community hackathons in India, where I contributed to WasteNot's Dashboard UI and deployment, showcasing technical problem-solving by integrating Groq AI.

Class Representative (2021-2023)

Served as Class Representative for 3 years, presented the collective opinions and concerns of the class in official meetings.

Certifications

Participation Certificate of HackHazard	**2025**
Hackathon	
Getting Started with Python	**2023**
Linkedin	

Extracurricular
